

About 16% of Idaho adults binge drink.

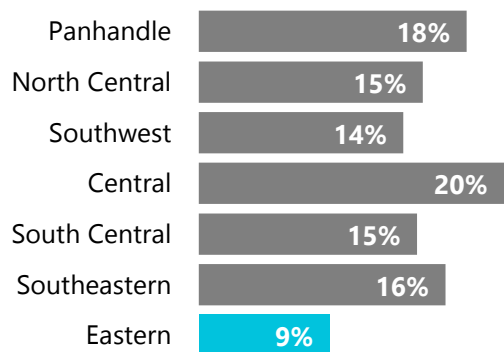

Let me tell you a little about them...

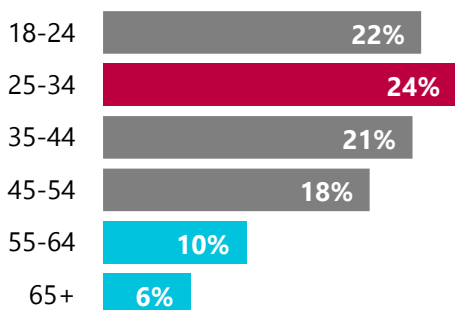

Males were significantly more likely to binge drink.

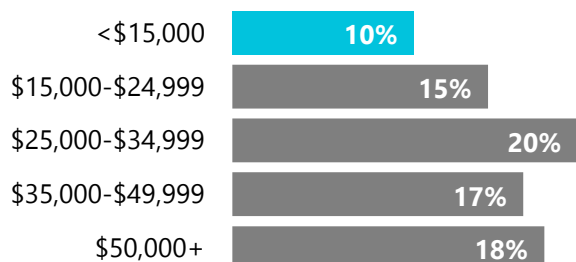

Eastern Idaho had a significantly lower percentage of binge drinkers.

Idahoans 25-34 were significantly more likely and Idahoans 55 and older were significantly less likely to binge drink.

Idahoans who made less than \$15,000 annually were significantly less likely to binge drink.

Neither race/ethnicity nor educational attainment impacted binge drinking.
